

GDFI is a contract research organization(CRO) registered in Korea providing services related to clinical trials, regulatory affairs, biostatistics, and quality systems by combining its comprehensive development services for the benefit of the pharmaceutical, biotechnology, medical device, diagnostic and affiliated health industries. The skilled and dedicated professionals at GDFI strive to offer the highest standards of clinical trial support for clients and focus on the highly-demanding IND/NDA registration work, ensuring that quality deliverables are produced in the most time-efficient manner for clients.

Working jointly with partners in Germany, U.S.A, and Japan, GDFI operates as a global CRO, capitalizing on its track record in global certifications and clinical trials to aid local and international clients enter into new markets and territories. GDFI offers cost-effective means for a non-local company to be represented in Korea, specifically via its ICC(In Country Caretaker) service, whereby GDFI acts as the regulatory importer, handling regulatory functions on behalf of the non-local manufacturer.
